

Chemically Etched Slits (25u, 35u, 50u & 75u)

July 27, 2015

These slits are NEW and chemically etched. They were used as *secondary slits* to pick out specific wavelengths on a commercial, **laboratory quality** spectrometer. They are left over stock from no longer produced units.

I only have a **LIMITED QUANTITY** of each version/slit width, so, I am **LIMITING EACH ORDER** to 'ONE (1) of each type slit' (up to 4) **in order to let other hobbyists have their chance at getting one!**

When I found this forum I noticed many peeps were not finding decent slits at hobbyist prices. Here's my chance to 'give back' to the many that have helped me! These are WAY BETTER than 2 razor blades!

For a Primary Slit application, the 30° Bevel should face TOWARD the Grating.

Cost for EACH SLIT is \$10.00 with free U.S. shipping. (Kept well within hobbyists budgets!)

To order, send an email to CindysYardSale@yahoo.com noting which slit(s) you would like (see below).

I will confirm in an email to you if the slit(s) are still available, and \$ amount (usually within 12 - 24hrs).

Upon receipt of your payment to my [PayPal](#) (\$10.00 X each slit), I will then confirm this to you, and send out your order.

This slit is thin and flexible, but still strong.

Available in 50u width. (Some 75u & very few 35u).

[\(Email for info.\)](#)

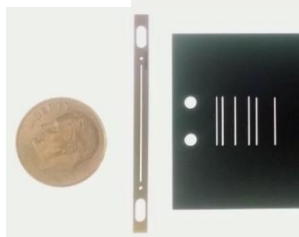

(Order) Slit Mask - 50u Looks like this ---->

Caution:

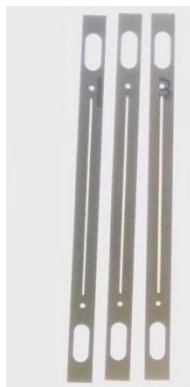

These Slits can be damaged easily!

Use EXTREME care when cleaning!

Comparison of the 2 versions ---->

This slit is more rigid (Stainless Layer).

(Order) Slit 1 - 25u Looks like this ---->

(Order) Slit 2 - 50u Looks like this ---->

(Order) Slit 3 - 75u Looks like this ---->
